REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art of record, Sato et al., US Patent 6,798,038, alone or in combination thereof, fails to show the following steps of:

Pertaining to independent claims 1 and 10, “ depositing a single deposition step an isolation insulator layer in said isolation apertures to a depth sufficient to fill said isolation apertures above said device layer by a first margin that is less than the thickness of said pad insulator...” and “etching said pad insulator layer with an etchant that does not attack said isolation insulator layer, whereby said pad insulator and said remaining portion of said isolation insulator layer are removed in the same step and said isolation plugs fill said apertures without CMP.”

Pertaining to independent claim 19, “etching said isolation insulator layer such that said sidewall thickness of said isolation insulator on said isolation aperture walls is removed and remaining isolation plugs of said insulator layer fill said apertures substantially coplanar with said device layer, without CMP” and “etching said pad insulator layer with an etchant that does not attack said isolation insulator layer, whereby said pad insulator and said remaining portion of said isolation insulator layer are removed in the same step and said isolation plugs fill said apertures without CMP.”

Pertaining to independent claim 21, “...performing before said step of forming set of apertures in areas of pad insulator...”

Art Unit: 2812

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
